1. Welcome

Nudge me Ready helps you remember what matters, get a gentle nudge at the right moment, and take a small next step when something feels hard.

This guide matches **v3 0.3.1** (the TestFlight app named Nudge me Ready v3). It sits next to the older 0.2.0 app if you still have that installed. The two apps do not share data.

Screenshots are from this version. On your phone, names and times will be yours — not the sample items shown here.

2. Getting started

First open — create your profile. Details stay on this phone.

- 1 Install **Nudge me Ready v3** from TestFlight and open it.
- 2 Choose a photo or emoji, then enter your **name**, **email**, and **date of birth**.
- 3 Accept **Terms of Use**, then tap create / continue.
- 4 Optionally set a password or PIN (and Face ID). You can skip this and turn it on later in Settings.
- 5 If a recovery code is shown, save it offline, then continue.
- 6 On the welcome screen, tap **See my day** to open Home.

3. Find your way

Five places live in the bar at the bottom:

Home

Add

Menu

4. Add something

Tap the round **Add** button. You do not need a Ready4 pack for everyday reminders.

Say it, pick a path, or tap Something else

Say it (fastest)

- 1 Tap **Say it** and speak naturally — for example, “remind me to take the bins out tomorrow evening”.
- 2 If you said *what* and *when*, it saves straight away and appears on Nudges and What’s coming up.
- 3 The first save may ask, calmly, to turn on quiet phone reminders. You can say not now.

Voice needs the TestFlight app (not a web preview) and microphone permission.

The six everyday paths

Path	Use it when
Plan it	Something is coming up
Remember it	You don't want to forget
Do it	You need to get something done (including optional drink / meal / move lists)
Book & go	You have somewhere to be
Buy & pay	Buy, pay, or renew
Life & people	People, celebrations, and things that matter

+ Something else is for anything that doesn't fit. If you type a time, it still saves with a reminder. You can always open an item later and change it.

Every nudge stays editable — title, when, notes, attachments

5. Nudges — Later, Sorted, Smaller, Ask

Nudges is your working list. You do not have to open an item to take a kind action.

Act from the list — no form, no guilt

Chip	What it does
Later	Moves it to tomorrow. That is allowed.
Sorted	Marks it done and can add a small Reward Bank point.
Smaller	Offers a tinier first step when it feels like too much.
Ask	Opens Ask for help about that item (a message from this phone).

Filter with Open / All / Done, or Dates / To-dos / Lists. Search if the list is long. Completing, snoozing, or skipping never costs you anything in the app.

6. Home and What's coming up

Home leads with **What's coming up** — today, then later — so you see the next real thing without hunting.

Home — next thing first

The full timeline

- Tap **See what's coming up** for Today / 7 days / Month / later.
- **Focus on this** starts a calm session on the next item.
- **Show my appointments here** (when offered) pulls phone calendar events onto the same timeline. Holidays and similar noise are skipped.
- If the timeline is empty, Home invites you to **Add something you don't want to forget**.

7. Focus

One thing, for a short while. Breaks are part of the plan.

- 1 Open **Focus**.
- 2 If something feels heavy, use **Why is this hard today?** or take the smaller step offered.
- 3 Start the timer. Pause, skip, or stop whenever you need — there is no failed streak.

8. Reward Bank

One bank for the whole app. Points stay small on purpose: a quiet treat, not a score you can fail.

Keep saving, then claim a treat when you are ready

Sorted and **I did something** can add points. Claim when it feels kind — Favourite coffee, a £10 treat, and other options you can rename.

9. Ready4Packs

Everyday paths work with no pack. Ready4 packs add extra templates into those same paths — they are not separate apps.

Browse from Home or Menu → Ready4Packs

- Open a pack to preview, then install. Items appear in Nudges and you can edit every one.
- Pack-specific choices (wedding, moving, baby, and so on) only show after that pack is installed.
- On TestFlight, if purchases are off, the app says you will not be charged and still lets you try packs.
- Medication, emergencies, and similar organisation are **not medical advice**. Follow your clinician. In immediate danger, contact emergency services.

10. Crew and Ask

Crew is people you trust. In this version, Crew lives **on this phone**. Invites and Ask open a message you send yourself — the other person does not see your list live on their phone yet.

Crew — Invite when you are ready

Share an invite

Ask — a message, not a live feed

1 Menu → **Crew** → **Invite**.

2 Choose Email, SMS, WhatsApp, or Copy link.

3 From a Nudges row, **Ask** can mention that item in the message.

Nudge me Ready is everyday support, not an emergency service. If someone is at immediate risk, contact emergency services.

11. Settings, lock, and reminders

Menu → Settings (or Profile)

Setting	Why it helps
Push	Lock-screen nudges when something is due — even if the app is closed.
Quiet hours	Rest without interruption overnight.
Daily summary	A morning “your day ahead” that names today’s real titles (or stays quiet if nothing is due).
Security	App lock, Face ID, recovery email, recovery code.

Setting	Why it helps
This is home	Optional leaving-home checklist once a home place is saved.
Voice	Speak to fill fields; hear text read aloud; speaking reminders on a timed nudge.

1. Save a time

On Add or details

2. Allow Push

The first save may ask

3. Phone nudges

At that time, on the lock screen

Forgetting a PIN or password resets the lock — it does not delete your nudges. Uninstalling the app does remove local data. Keep the recovery code offline (paper or a password manager).

12. My money

Menu → **My money** works with no Ready4 pack: what's coming in, going out, and left — no judgement. Ready4 project budgets only appear if you install that pack.

13. Privacy

- Nudges, notes, attachments, and settings stay on this phone and are encrypted at rest.
- This version does not sync to the cloud. A reinstall starts empty.
- Permissions (notifications, microphone, location, contacts, calendar, Face ID, photos) are only used for features you turn on.
- Full policy: [Privacy policy](#)

14. Tips

Reminders don't fire

Use the TestFlight v3 app, not a web preview. iPhone Settings → Nudge me Ready v3 → Notifications, then in-app Push. Quiet hours hold alerts overnight on purpose.

I still have the old app

Keep using **Nudge me Ready** 0.2.0 if you were testing v2. Open **Nudge me Ready v3** for this guide. Both icons can sit on the Home Screen.

Need a hand

Email support@nudgemerready.app with your iPhone model, iOS version, what you were trying to do, and a screenshot if it helps.
